1. Welcome remarks

Thank you for buying our product. We hope you will be fully satisfied with the Axtel headset that you have purchased.

Depending on the needs, you can choose a version that only connects to a landline phone (X1) or an expanded version with the possibility to make calls on three different communication channels (X3).

PRIME X is a wireless solution for making telephone calls on different communication channels. This greatly expands the flexibility of the caller.

Key characteristics of the headset:

High-quality sound

Excellent audibility and advanced noise reduction

Innovative electronic equipment compatible with IT telephones

Flexible design

Acoustic Protection technology

One-ear and both-ears versions

Compatibility with most telephones available on the market

CONTROL-CHARGING BASE

1) Connection to a landline phone (version X1 and X3), softphone software (PC - version X3), and a mobile phone with Bluetooth (version X3).

2) Visual signaling of calls and the battery charging level of the headset.

3) Microphone sensitivity setting (for each communication channel separately).

EARPIECE

1) Call range 200 m.

2) Call time 10 h.

3) Wideband sound quality.

4) Multi-functional button for easy and intuitive handling of calls.

5) Visual signaling of calls.

6) Volume adjustment buttons.

7) Advanced hearing protection settings - 3 levels: **85 dB, 87 dB, and 105 dB.**

8) Multi-level adjustment of headband and microphone settings to fit the user's head.

9) Possibility to change the position of the earpiece on the head - right or left side.

BLUETOOTH®

Standard Bluetooth®

Bluetooth® 4.2 – Bluetooth® Low Energy (BTLE) compatible with Bluetooth® 5.0.

Wireless telecommunication range - up to 200 m for communication of the headset with the base (DECT). Up to 15 for communication with mobile devices.

Bluetooth pairing list - max. 8 devices

Simultaneous Bluetooth connections - 1 device

Important information about the use of the wireless headset

Read this instruction carefully and follow it at all times.

WARNINGS

- Avoid listening for a long time with the maximum sound volume.
- The volume of the sound can differ depending on the connected device and its settings.
- If you feel discomfort, switch off the device to which the headset is connected.
- The wireless Axtel headset is provided with Acoustic Protection technology which limits the volume to 85 dB, 87 dB, or 105 dB.
- When you feel discomfort caused by direct contact of the device with the skin, stop using the headset and contact Axtel Headsets. Continued use of the headset may result in allergic reactions, such as redness or rash.

RECOMMENDATIONS

- The skins and the protective foams should be replaced at least once every 6 months.
- The headset should be cleaned with special tissues for electronic devices.
- Keep the headset in a safe place, away from moisture and extreme temperatures.
- Do not use the product if it is defective or incomplete.

2. Content of the package

PRIME X1

7. Operation of multiple devices

7.1 Switching between channels

By pressing the MFB button and holding it for about 2 seconds, you can switch between channels. During an active call, when a call from another channel is collected, the active call is put on hold and the newly collected call becomes active. When an active call is terminated, the headset switches to the next active call (clockwise).

7.2 Switching between channels or collecting an incoming call

Pressing the button corresponding to the respective channel. During an active call, when a call from another channel is collected, the active call is put on hold and the newly collected call becomes active. When an active call is terminated, the headset switches to the next active call (clockwise).
