Plug & Play	Yes
Wearing style	Mono

Description:

Impressively comfortable, loaded with tried-and-tested features, in a refined design. Meet Axtel One - a new generation of smart headsets with noise-canceling microphones, compatible with leading communication platforms. A moment of privacy? No need to touch your computer, with a single tap you will mute the microphone, change the volume and answer calls on the integrated in-line module. With One you'll hear your caller clearly, just as well as all the tones of your favorite song. We've placed the powerful 40mm driver in a specially designed housing that reduces acoustic distortion, while the One's built-in audio microprocessor constantly monitors and fine-tunes audio parameters for the best sound. In addition, One is fitted with a dual microphone unit with advanced ambient noise reduction algorithms, so your caller will always hear no one but you. We know that a favorite headset is a comfortable headset. We've designed every element of the One with all-day comfortable wear in mind. The combination of soft-touch materials, vegan leather, ultra-lightweight design and matt black rubber finishes makes a recipe for ultimate comfort. The Axtel One is a perfect headset for office, call centre, home, and anywhere you need to quiet down and listen to music or focus on a meeting with a client. One is simply.... One of a kind!
